

— PROJECT 01 / 10 · NOW LIVE

NexoraPro Commerce.

A full-stack storefront and commerce operations platform,
built and deployed end to end.

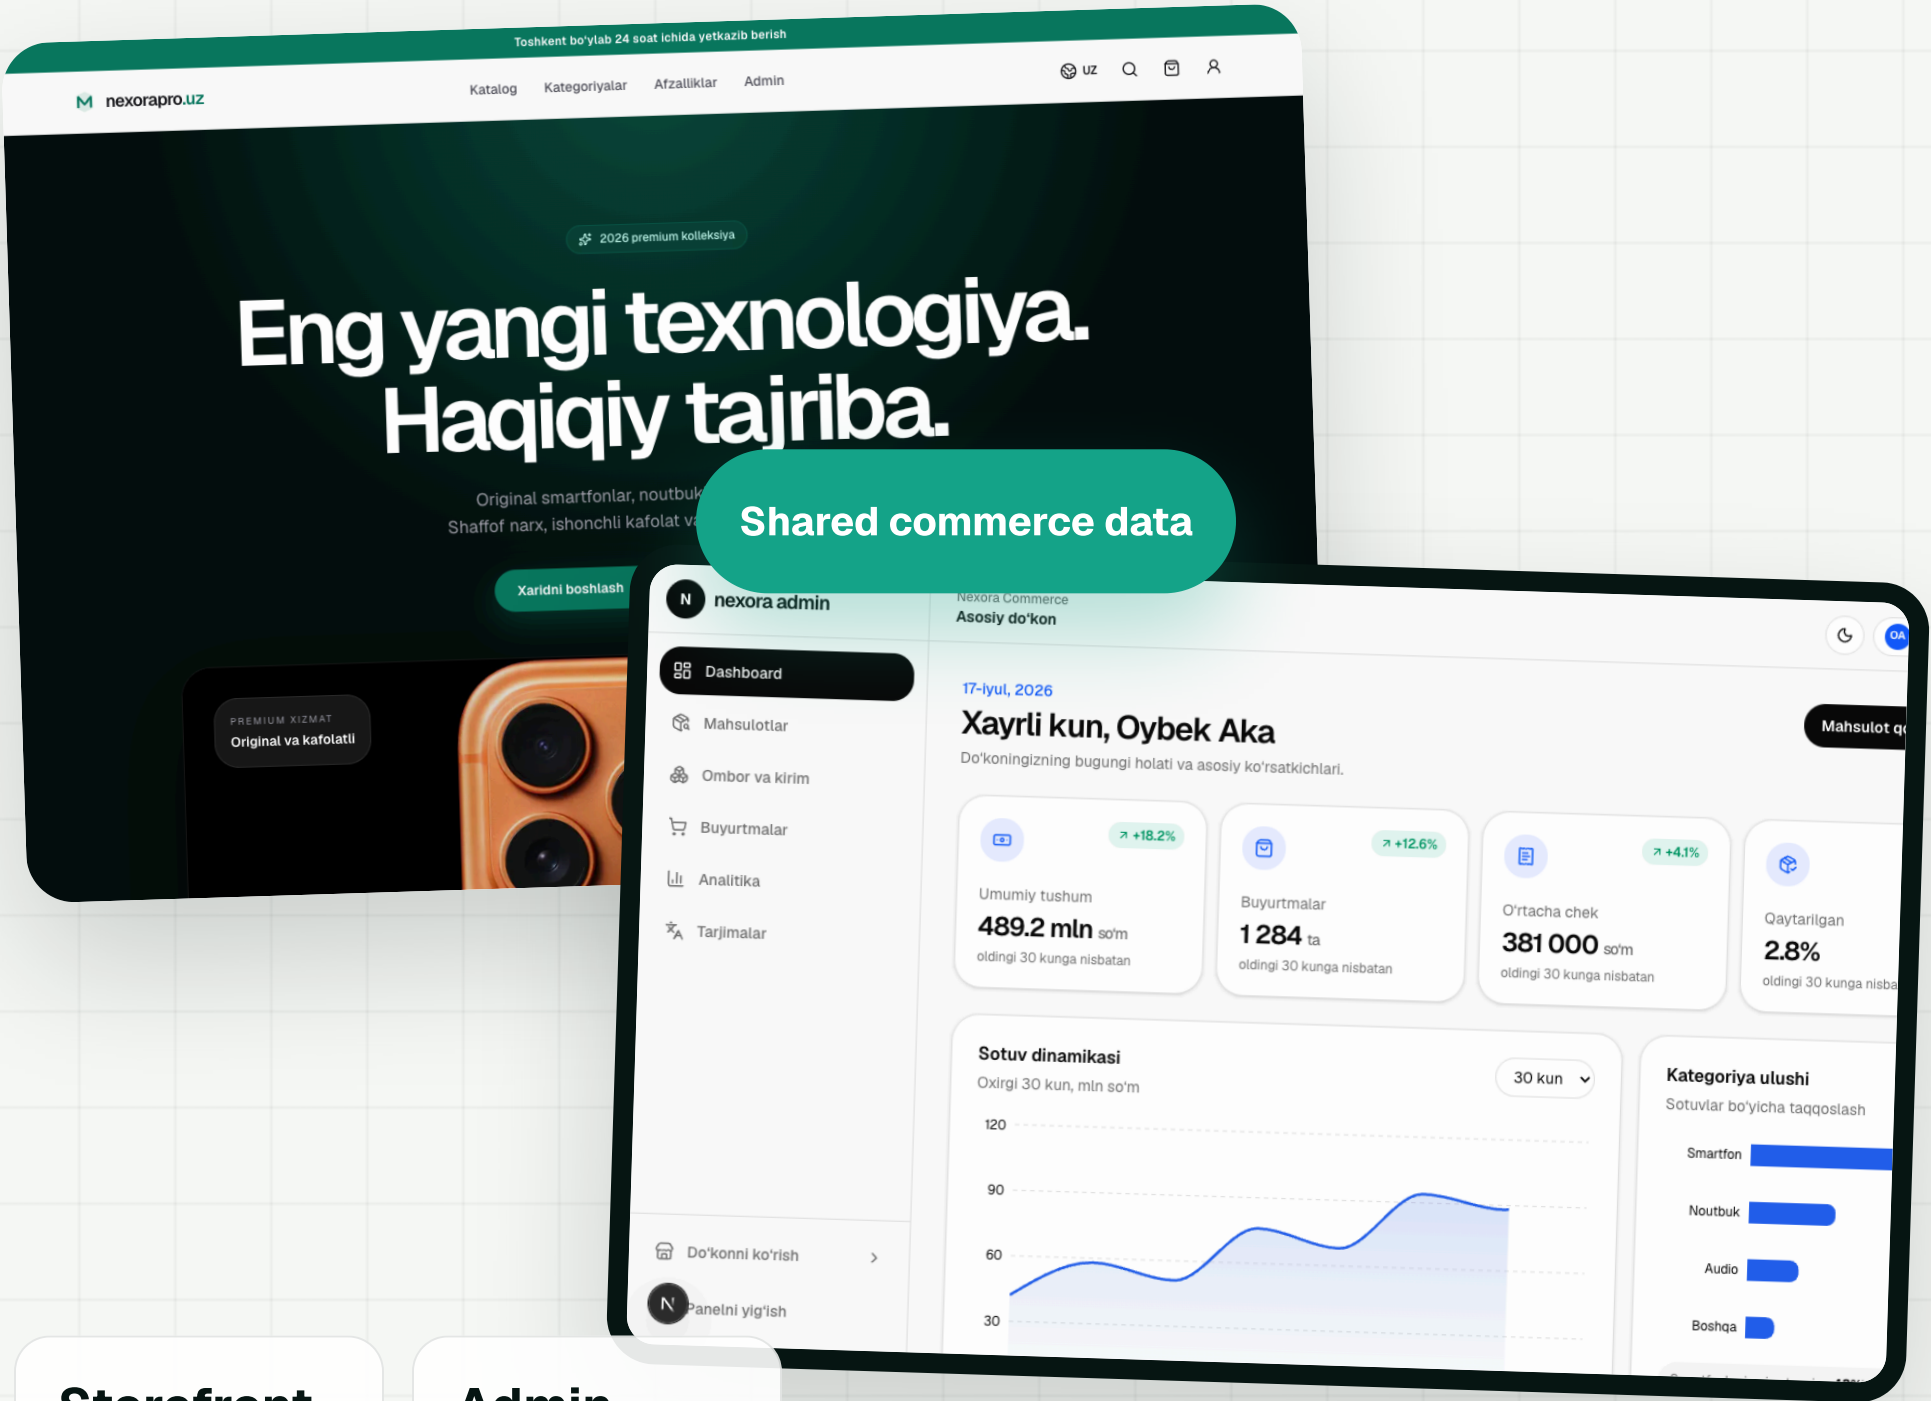

Swipe to explore the product and engineering →

THE PRODUCT

One platform. One source of truth.

The customer experience and operational workspace share the same products, pricing, stock, orders, and reports.

Storefront

Customer experience

Admin

Business operations

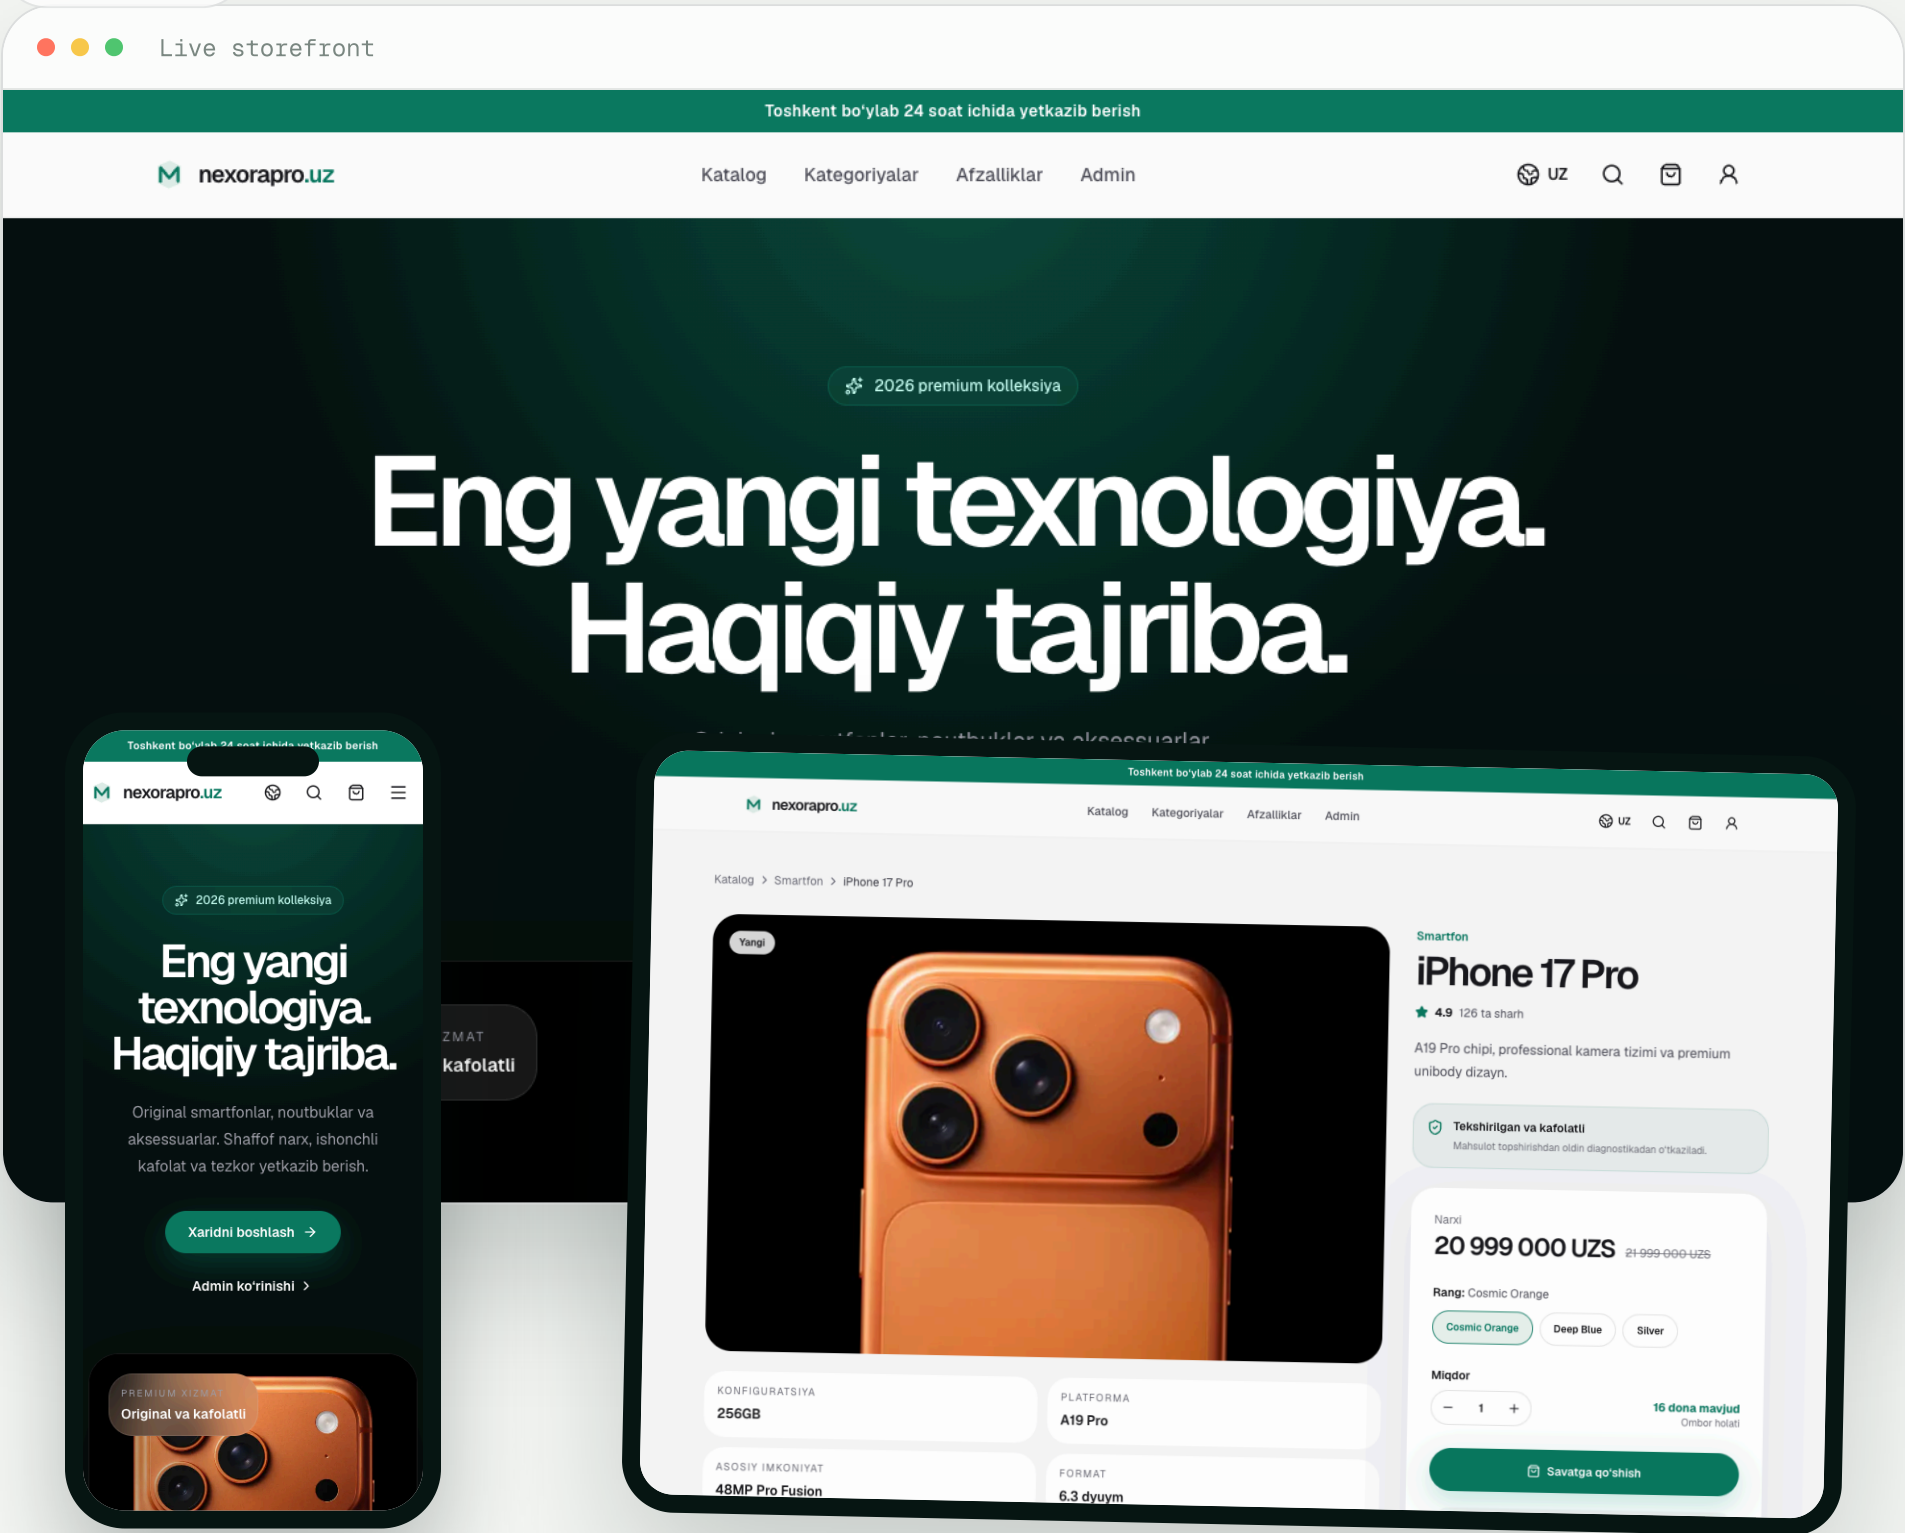

CUSTOMER EXPERIENCE

Designed for discovery. Built for purchase.

- Responsive catalog
- Search & filters
- Product variants
- Persistent cart
- Map checkout

UZ · RU · EN

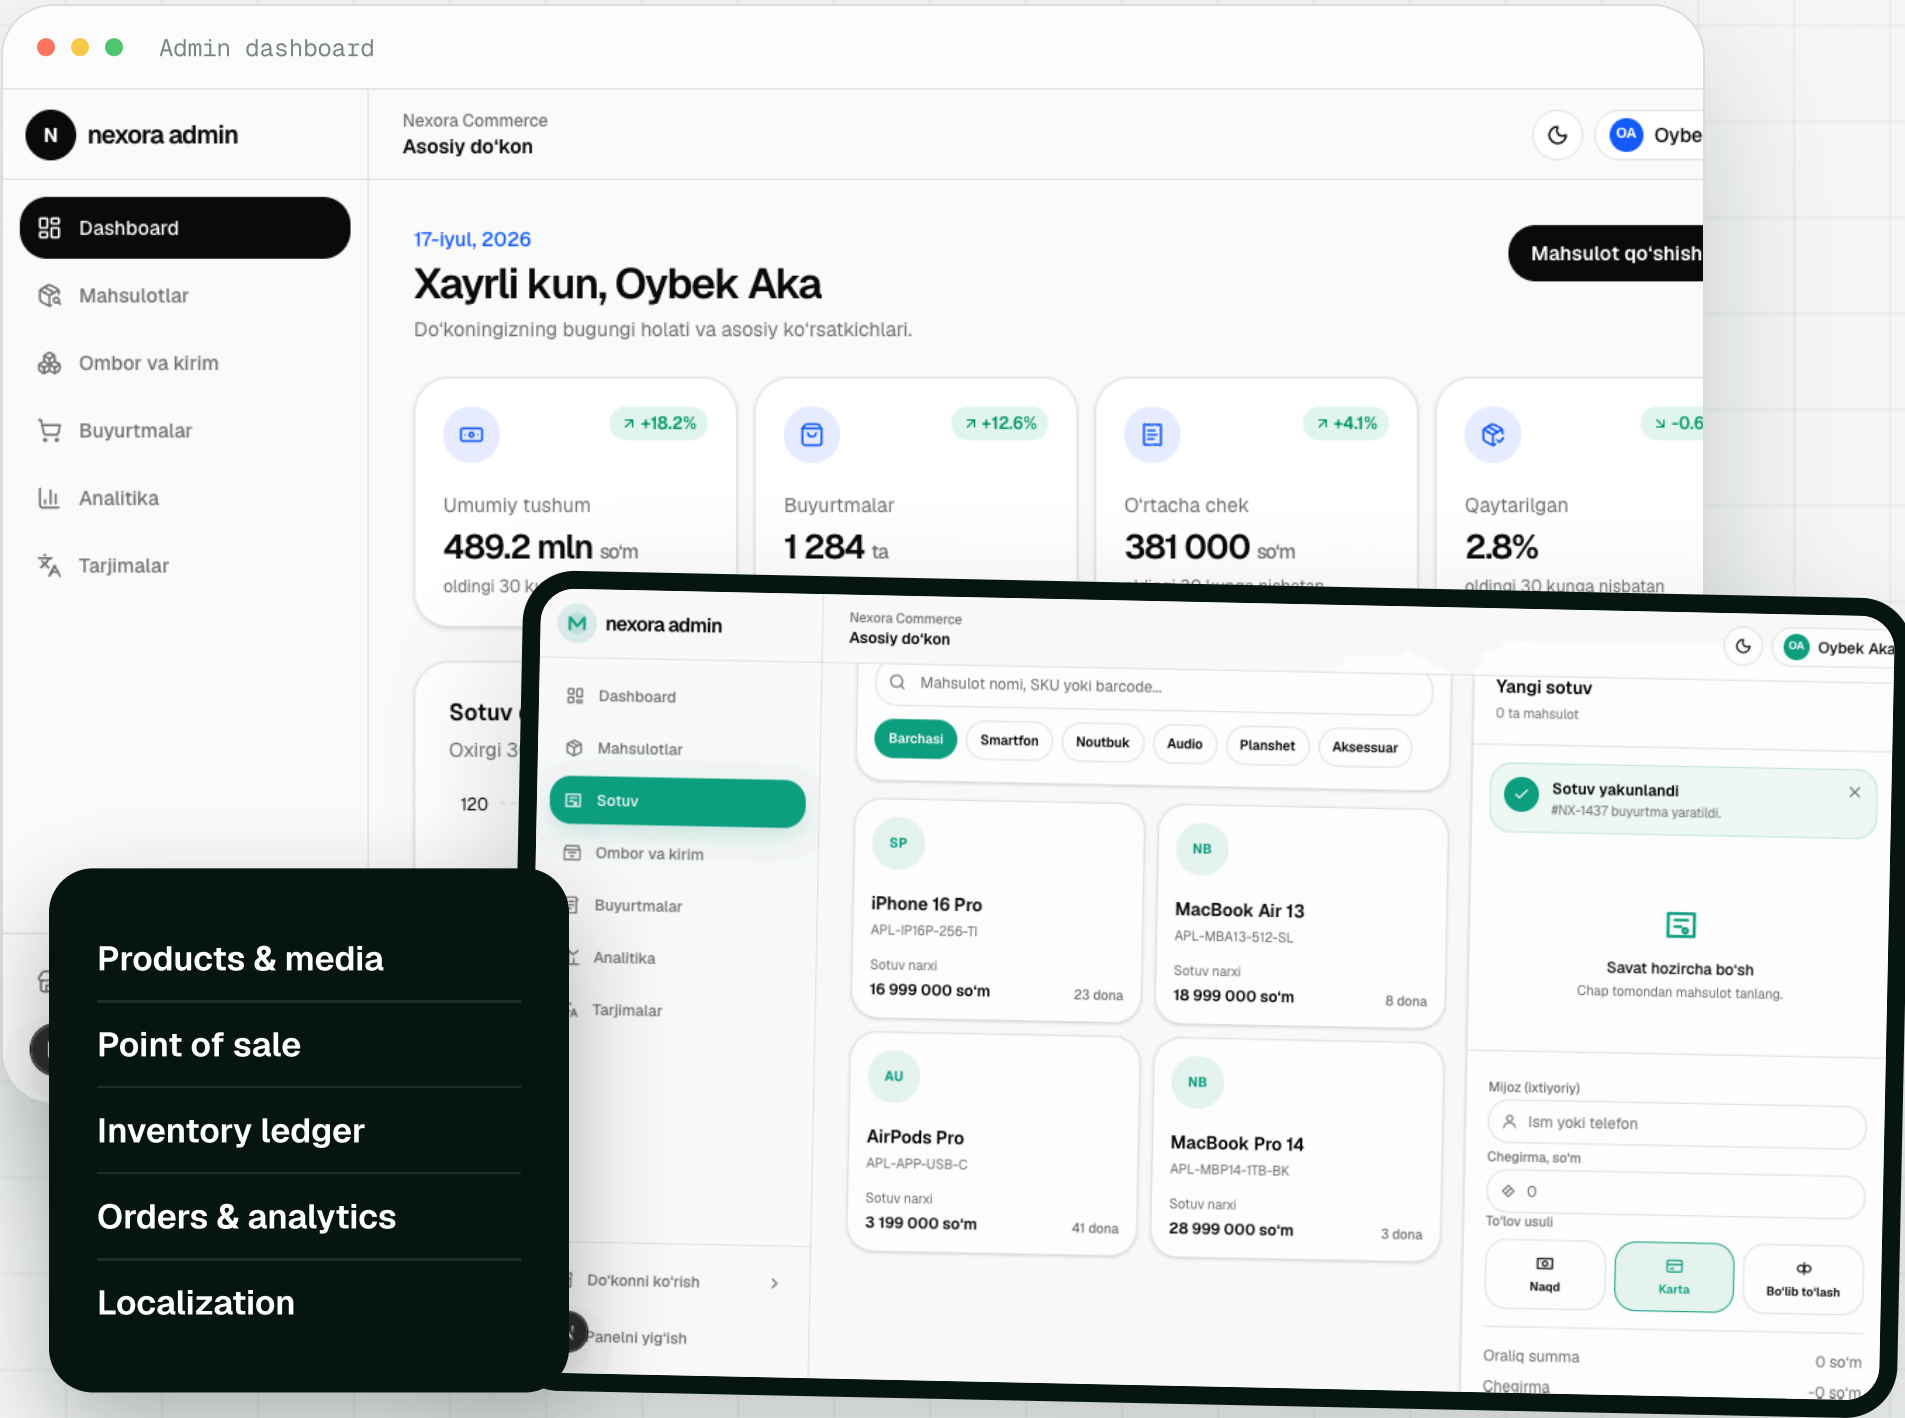

— OPERATIONS WORKSPACE

Everything behind the storefront.

A role-protected admin workspace for the daily work of running the store.

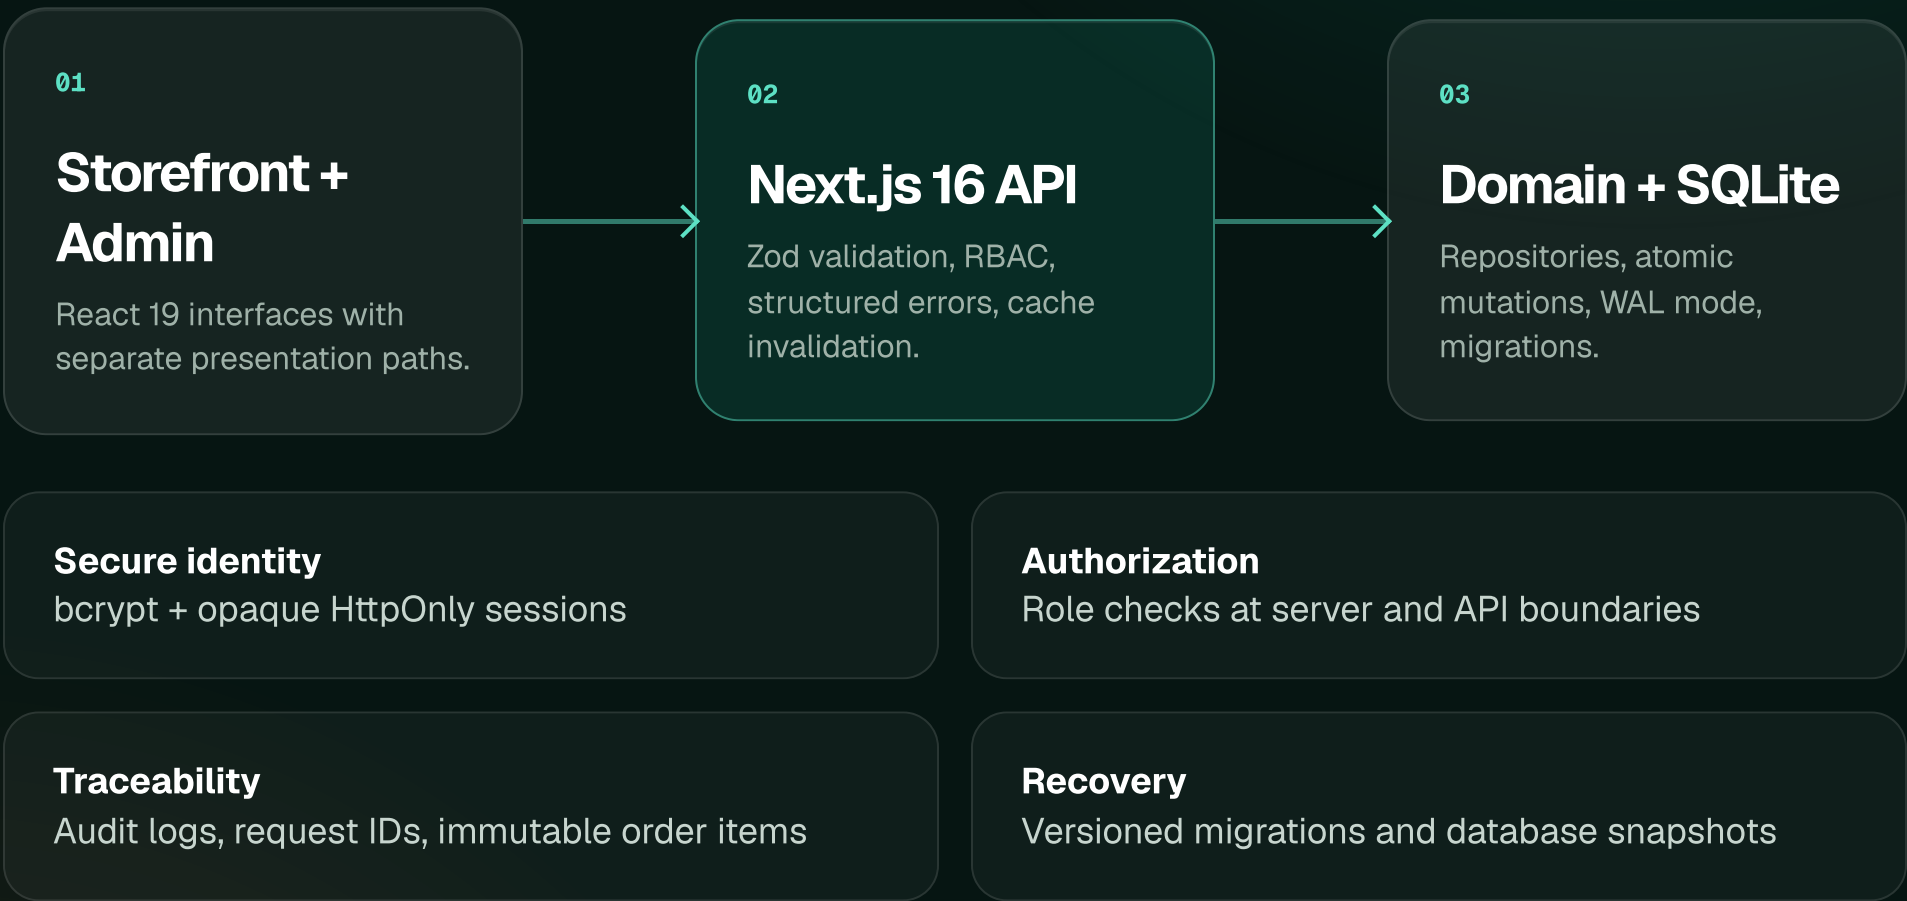

ENGINEERING DECISIONS

Consistency is a feature.

The architecture protects the boundaries where commerce data can become inconsistent.

Atomic order workflow

Order creation and stock deduction commit together. Cancellation restores stock transactionally.

— PRODUCTION DELIVERY

From commit to healthy release.

Automated quality gates and an atomic VPS deployment keep releases repeatable and recoverable.

01

Quality gates

Locked install · ESLint · production build · integration tests

VERIFIED

02

Standalone package

Minimal traced Next.js runtime with secret-file checks

PACKAGED

03

Atomic VPS release

GitHub Actions → Ubuntu → Nginx → PM2

DEPLOYED

04

Health check

Verify the live API and automatically roll back on failure

HEALTHY

HTTPS

Let's Encrypt

Backups

Pre-migration snapshots

CI/CD

GitHub Actions

Recovery

Automatic rollback

PROJECT 01 / 10 COMPLETE

Explore the product. Review the code.
